Portfolio: loganhild.github.io/full-stack-web-developer/ |

GitHub: <https://github.com/LoganHild>

Full-stack web developer leveraging a background in customer service and care for disabled adults. Working with disabled adults provided skills in working with others and goal-oriented tasks while developing skills with decision making and problem solving as an independent staff member. About 6 years in total spent in this position taught skills in how to stay focused, organized, calm under stress, and to adapt to change. These skills were demonstrated when a client we were serving became physically aggressive towards staff and other clients. My immediate action was to divide roles between 3 staff for documentation/relocation of other clients, contacting supervisors for the support needed, and myself working on de-escalating the physically aggressive client. This quick thinking allowed for a quick and safe solution to be achieved for all parties while being commended by the supervisor and nursing when they arrived. These skills will allow me to find solutions to nearly any problem faced in a new position. Recently earned a certificate in full-stack development from the University of Minnesota Coding Bootcamp, learning quickly to gain proficiency in HTML, CSS, and JavaScript. My goal with these newly acquired skills is to create a user-friendly, accessible, and interactive web experience for every user, while aligning with specific goals and exceeding expectations.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, SQL

Applications: GitHub, MySQL, MongoDB

Tools: Express, Node, jQuery, Bootstrap, React

PROJECTS

Forecast with a Chance of Camping |

<https://github.com/LoganHild/forecast-with-a-chance-of-camping> |

EXPERIENCE

Cardinal of Minnesota DSP

**2020 - Present
Red Wing, MN**

Supported vulnerable adults in all aspects of their lives such as grooming, medication administration, job searches, and leisure activities.

Key Accomplishments:

- Worked on goal-oriented programs to improve the lives of those supported.
- Coordinated with a team to determine the best course of action to take towards improving services and solving problems.
- Repeatedly praised by coworkers and supervisors and asked to take on a supervisor position based on care provided and attention to detail.

The Mentor Network DSP

**2014-2019
Red Wing, MN**

Supported elderly vulnerable adults with their personal care needs, medication administration, dietary needs, and interpersonal interactions in a more medical oriented and fast-paced environment.

Key Accomplishments:

- Was trusted and trained by house RN to transcribe medications into the med books for other DSP's to then administer.
- Called "the glue that holds this place together" by the program director for maintaining interpersonal relationships while ensuring excellent care for clients.
- Was asked by RN and LPN to perform certain personal care for clients in their place due to rapport with each client and knowledge of their specific needs/preferences.
- Worked with up to 6 clients simultaneously at any given time, fulfilling all of their needs on a daily basis.
