Full-stack web developer leveraging a background in customer service and care for disabled adults. Working with disabled adults provided skills in working with others and goal-oriented tasks while developing skills with decision making and problem solving as an independent staff member. The independence taught skills in how to stay focused, organized, calm under stress, and to adapt to change. I demonstrated these skills when a client we were serving became physically aggressive towards staff and other clients. I immediately divided roles between 3 staff for documentation/relocation of other clients, contacting supervisors for the support needed, and myself working on de-escalating the physically aggressive client. This resulted in a quick and safe solution to the problem as well as being commended by our supervisors and nursing when they arrived. Being able to stay focused, organized, calm, and adapt to change will allow me to find solutions to nearly any problem faced in a new position. Recently earned a certificate in full-stack development from the University of Minnesota Coding Bootcamp, learning quickly to gain proficiency in HTML, CSS, and JavaScript. My goal with these newly acquired skills is to create a user-friendly, accessible, and interactive web experience for every user, while aligning with specific goals and exceeding expectations. I have about 6 years of professional experience as a DSP under my belt.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, jQuery, SQL
Applications: GitHub, Heroku
Tools: Express, Node, jQuery, Bootstrap, MySQL, MongoDB, React, Material UI, GraphQL, BCrypt, Handlebars, API

PROJECTS

Plant-It Sell-It | https://github.com/delaluz12/plantit-sellit |
https://plantit-sellit.herokuapp.com/

EXPERIENCE

Cardinal of Minnesota   2020 - Present
DSP   Red Wing, MN
Supported vulnerable adults in all aspects of their lives such as grooming, medication administration, job searches, and leisure activities.
Key Accomplishments:
- Worked on goal-oriented programs to improve the lives of those supported.
- Coordinated with a team to determine the best course of action to take towards improving services and solving problems.
- Repeatedly praised by coworkers and supervisors and asked to take on a supervisor position based on care provided and attention to detail.

The Mentor Network   2014-2019
DSP   Red Wing, MN
Supported elderly vulnerable adults with their personal care needs, medication administration, dietary needs, and interpersonal interactions in a more medical oriented and fast-paced environment.
Key Accomplishments:
- Was trained by house RN to transcribe medications into the med books for other DSP's to then administer.
- Worked with up to 6 clients simultaneously at any given time, fulfilling all their needs on a daily basis.

EDUCATION
Certificate, Full Stack Web Development—University of Minnesota **Minneapolis, MN**

High School Diploma—Cannon Falls High School   **Cannon Falls, MN**
